Designed by Ryan Quadros

This booklet was prepared in the context of the project '**Building a Multi-Ethnic and Multi-National Cyprus to promote European Values and Regional and International Peace**'.

The main objective of the project is to promote awareness and increase the sensitivity of the Cypriot Society on how a multi-ethnic and multi-cultural Cyprus serves European values and promotes regional and international peace.

To meet the main objective, the project engaged students, teachers and parents in workshops and activities to create a vision map for a multi-cultural and multi-ethnic Cyprus, as well as visualize and implement specific activities, which contribute towards materializing the vision for a multi-cultural society.

The coordinating organization of this project is the Future Worlds Center (legal reg.: Cyprus Neuroscience and Technology Institute), based in Nicosia. The project's partner organizations are: the Cyprus Adult Education Association, the Human Rights and Education Network, the University of Cyprus (Department for Political Sciences), and the Young Cypriot Scientists Network. The project is part of UNDP's initiative Action for Cooperation and Trust (ACT), which receives support from the American people through a grant from USAID.

This project addresses three immediate target groups:

- ❖ students of different ages
- ❖ parents
- ❖ teachers

Furthermore, through a number of additional actions, such as Panel Discussions, a Conference and Information Events it targets the Cypriot society, at large.

The booklet has been produced with the financial assistance of UNDP Action for Cooperation and Trust. The contents of this document are the sole responsibility of the Future Worlds Center (legal reg.: Cyprus Neuroscience and Technology Institute) and can under no circumstances be regarded as reflecting the position of UNDP. The views expressed in this publication are those of the author(s) and do not necessarily represent those of the United Nations or its Member States, UNDP or USAID.

Introduction

This structured interactive workshop was organized as part of the project “Building a Multi-Ethnic and Multi-National Cyprus to promote European Values and Regional and International Peace.” The main aim of this project is to promote awareness and increase the sensitivity of the Cypriot society on how a multi-ethnic and multicultural Cyprus serves European values and promotes regional and international peace.

The project engages students, teachers and parents in co-laboratories (i.e., interactive workshops in which participants define the content of the dialog) and activities to create a “vision map” for a multicultural and multi-ethnic Cyprus, as well as visualize and implement specific activities, which contribute towards materializing the vision for a multicultural society.

The workshop at the Elementary School Deryneia A’ was organized thanks to the enthusiastic and constructive support of Mrs. Stella Gabriel, teacher, and Mr. Eleftherios Papagiannis, headmaster at the school.

Acknowledgements

The Facilitation Team that organized the SDDP co-laboratories would like to thank the teachers and the headmaster of the Elementary School Deryneia A', the participating parents and especially the 14 students for their participation, their enthusiastic contributions, time, energy and expertise they brought to the dialog.

All 26 participants were willing to commit the necessary time and to work together to develop a shared understanding of the obstacles they experience in their daily school life. Moreover they managed to envision an ideal future. Their hard work, perseverance and humour made the workshop's experience both richly diverse and productive.

Methodology: Structured Dialogic Design Process

The Structured Dialogic Design Process (SDDP) is a methodology that supports democratic and structured dialogue among a group of stakeholders. It is especially effective in resolving multiple conflicts of purpose and values, and in generating consensus on organizational and inter-organizational strategy. It is scientifically grounded on 7 laws of cybernetics/systems science and has been rigorously validated in hundreds of cases throughout the last 30 years.

The Cyprus team has extensive experience in the application of the method. They have used it in many forums to facilitate organizational and social change. For example, they have used it in **three large European networks of experts** (Cost219ter¹, Cost298², Insafe³) and in the peace process of Cyprus⁴.

The SDDP is specifically designed to assist inhomogeneous groups to deal with complex issues, in a reasonably limited amount of time. It enables the integration of contributions from individuals with diverse views, backgrounds and perspectives through a process that is structured, inclusive and collaborative.

A group of participants, who are knowledgeable of the particular situation are engaged in collectively developing a common framework of

1 The Cost219ter is a network of experts from 20 countries (18 European plus USA and Australia) who are concerned on how broadband technologies and next-generation networks will make services more accessible and more transparent (ambient intelligence) to all. The Cost219ter community has used SDDP to define the obstacles that prevent practical broadband applications being produced and exploited. Based on the results of the structured dialogue, they developed their strategy for the next 3 years.

2 The Cost298 is a network of experts like the Cost219ter, which focuses on Broadband technologies for all.

3 Insafe is a network of 27 safer Internet Awareness Nodes throughout Europe. They used SDDP in many of their meetings to identify obstacles, develop vision and agree on action plans. The Cypriot node is at www.CyberEthics.info. These reports are on line.

4 The SDDP methodology was used to facilitate dialogue between Greek and Turkish Cypriots since 1994. This dialogue culminated to the formation of an embryonic peace movement. A number of publications are available.

thinking based on consensus and shared understanding of the current or future ideal state of affairs. The SDDP promotes focused communication among the participants in the design process and their ownership of and commitment in the outcome.

Structure and Process in a typical SDDP Co-Laboratory

When facing any complex problem the stakeholders can optimally approach it in the following way:

1. Develop a shared vision of an ideal future situation. This ideal vision map serves as a magnet to help the social system transcend into its future state.
2. Define the current problematique, i.e., develop a common and shared understanding of what are the obstacles that prevent the stakeholders' system from being in its ideal state.
3. Define actions/options or a roadmap to achieve the goals.

The three phases are done using exactly the same dialogue technique. Each phase completes with similar products:

1. A list of all ideas [SDDP is a self-documenting process].
2. A cluster of all ideas categorized using common attributes.
3. A document with the voting results [erroneous effect=most popular ideas do not prove to be the most influential!]
4. A map of influences. This is the most important product of the methodology. Ideas are related according to the influence they exert on each other. If we are dealing with problems, then the most influential ideas are the root causes. Addressing those will be most efficient. If we deal with factors that describe a future ideal state, then working on the most influential factors means that achieving the final goal will be easier/faster/more economic, etc.

In the following, the process of a typical SDDP session with its phases is

described more precisely:

- First The breadth of the dialogue is constrained and sharpened with the help of a triggering question. This is formulated by a core group of people, who are the Knowledge Management Team (KMT) and is composed by the owners of the complex problem and SDDP experts. This question can be emailed to all participants, who are requested to respond with at least three contributions before the meeting.
- Second All contributions/responses to the triggering questions are recorded in the Cogniscope II software. They must be short and concise. One idea in one sentence! The authors may clarify their ideas in a few additional sentences.
- Third The ideas are clustered into categories based on similarities and common attributes. A smaller team can do this process to reduce time (e.g., between plenary sessions).
- Forth All participants get five votes and are asked to choose their favourite (most important to them) ideas. Only ideas that received votes go to the next and most important phase.
- Fifth In this phase, participants are asked to explore influences of one idea on another. For example, they might be asked to decide whether solving one problem will make solving another problem easier. If the answer is yes (great majority) an influence is established on a map of ideas. The way to read that influence is that items at the bottom are root causes (if what is being discussed are obstacles), or most influential factors (if what is being discussed are descriptors of an ideal situation or actions to take). Those root factors must be given priority.
- Sixth Using the root factors, we develop an efficient strategy and come up with a road map to implement it.

Agenda of the Co-Laboratory

The interactive workshop was planned to last two days – one afternoon/evening session and one morning/afternoon session. As the time available was too short to create the influence maps in a manner that included all ideas selected by the participants, the workshop team together with all students, parents and teachers decided to extend the workshop to a third date – an afternoon session on 16 November.

The first session focused on the Vision of a multicultural school, whereas the second session focused on the Obstacles that prevent the ideal multicultural school from being materialised. The agenda of the co-laboratory was the following:

Friday, 02 November 2007 3.30pm – 7.30pm	
3.30 pm – 4.00 pm	Welcome, Introduction to Methodology
4.00 pm – 5.00 pm	Generation of Ideas for a multicultural school (Vision)
5.00 pm – 5.30 pm	Clarification of Ideas (Vision)
5.30 pm – 5.45 pm	Coffee Break
5.45 pm – 6.00 pm	Classification of Ideas (Vision)
6.00 pm – 6.15 pm	Voting of Ideas (Vision)
6.15 pm – 7.30 pm	Development of Tree of Influence (Vision)

Saturday, 03 November 2007 9.30am – 3.00pm	
9.30 am – 9.45 am	Welcome, Introduction to the workshop
9.45 am – 11.15 am	Tree of Influence (Vision)
11.15 am – 11.30 am	Coffee Break
11.30 am – 12.45 pm	Discussion of Tree of Influence (Vision)
12.45 pm – 2.00 pm	LUNCH
2.00 pm – 3.00 pm	Generation of Factors (Obstacles)

As the time available was too short to go through all stages of the second (Obstacles) together, the parents, students and teachers met independently for the clustering and voting process, and got together in a third workshop session with the facilitators to create the Tree of Influence for the Obstacles.

Friday, 16 November 2007 3.30pm – 5.30pm	
3.30 pm – 4.00 pm	Prioritization of Factors (Obstacles)
4.00 pm – 5.30 pm	Tree of Influence (Obstacles)

A. Vision of an Ideal Multicultural School

During the first session of the workshop, the participants engaged in a structured dialogue focusing on the triggering question:

What are the characteristics of an ideal school that values the characteristics of the new multicultural European Cyprus, for the benefit of the pupils?

[Ποιά είναι τα χαρακτηριστικά του ιδανικού σχολείου που αξιοποιεί τα στοιχεία της νέας πολυ-πολιτισμικής Ευρωπαϊκής μας Κύπρου, προς όφελος των παιδιών;]

The participants of the interactive workshop collected a total of 82 ideas characterizing the ideal multicultural school. All ideas can be found in Table 1 below. In a next step, a smaller group of the participants clustered all ideas. The following nine clusters were formed:

Cluster 1: Culture and civilization [Κολτούρα και Πολιτισμός]

Cluster 2: Friendship [Φιλία]

Cluster 3: Programmes [Προγράμματα]

Cluster 4: Religion [Θρησκεία]

Cluster 5: Dances and Games [Χοροί και Παιχνίδια]

Cluster 6: Classroom [Τάξη]

Cluster 7: Language [Γλώσσα]

Cluster 8: Racism [Ρατσισμός]

Cluster 9: Various [Διάφορα]

The clusters and all the ideas included in each of them can be found in Table 2.

Having classified all ideas according to the clusters, all participants voted for their five most favorable ideas. Given the rather large size of the group, the votes were widely spread among most of the ideas. The ideas that received most votes were:

Idea# 38 (11 votes): The children will not be treated as visitors [Τα παιδιά να μην αντιμετωπίζονται σαν επισκέπτες]

Idea# 2 (9 votes): Tendencies and skills to be developed for the acceptance of the new element and new culture [Να καλλιεργούνται στάσεις και δεξιότητες για αποδοχή του νεού στοιχείου και της νέας κουλτούρας]

Idea# 48 (9 votes): Trips and travels should be organised to get to know different cultures [Να οργανώνονται εκδρομές ή ταξίδια για γνωριμία διαφορετικών πολιτισμών]

Idea# 62 (7 votes): The children will feel comfortable in the classroom regardless of race and home country [Τα παιδιά να νιώθουν άνετα στη τάξη τους ανεξάρτητα από φυλή και πατρίδα]

Idea# 1 (6 votes): To have a flexible school curriculum according

to the composition of the school [Να υπάρχει ευέλικτο αναλυτικό πρόγραμμα ανάλογα με τη σύνθεση του σχολείου]

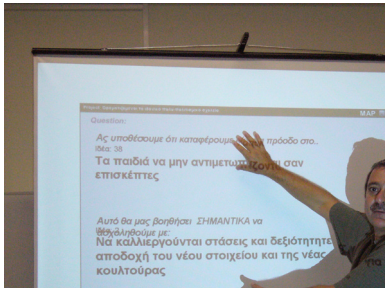

Idea# 3 (5 votes): Every child should have the chance to be taught his/her mother tongue [Να έχει την ευκαιρία το κάθε παιδί να διδάσκεται τη μητρική του γλώσσα]

Idea# 28 (5 votes): The children that speak a different language will participate in extra lessons for Greek as second language [Τα αλλόγλωσσα παιδιά να παρακολουθούν ειδικό μάθημα ελληνικών ως δεύτερη γλώσσα]

Idea# 44 (5 votes): Enriching the school library with books written in various languages [Εμπλουτισμός της σχολικής βιβλιοθήκης με βιβλία που είναι γραμμένα σε διάφορες γλώσσες]

Furthermore, the following Ideas received one or more votes and were structured in the next step: Ideas # 10, 11, 13, 16, 20, 22, 23, 27, 30, 32, 42, 47, 51, 52, 53, 63, 67, 74

The voting results were used to select ideas for the subsequent structuring process. The participants managed to structure 26 ideas that received one or more votes and were selected important according to their interrelations. The result (Table 3) is the created 'influence tree', showing the root causes facilitating the materialization of the ideal multicultural school. The highly complex influence map consists of eight different levels of influence.

How to read the Influence Tree

The tree of influence developed in this first part of the workshop is divided into eight different levels of influence. Ideas at the bottom are considered to be most influential. Making progress or achieving results in those bottom ideas makes it a lot easier to address those that lie higher in the map.

In summary, almost all participants approved that the following ideas are the most influential and agreed that further actions must take these ideas into account:

Idea# 1: To have a flexible school curriculum according to the composition of the school [Να υπάρχει ευέλικτο αναλυτικό πρόγραμμα ανάλογα με τη σύνθεση του σχολείου]

Idea# 20: The parents' associations and the teaching staff will be from many countries [Οι σύνδεσμοι γονέων και το διδακτικό προσωπικό θα είναι από πολλές χώρες]

- Idea# 52: The children will talk to their classmates about their country: they will teach them [Τα παιδιά να μιλούν στους συμμαθητές τους για την πατρίδα τους: να τους κάνουν μάθημα]
- Idea# 47: A hall for multiple purposes should be created, which will serve the needs of each culture. [Να δημιουργηθεί αίθουσα πολλαπλής χρήσεως που να ικανοποιεί τις ανάγκες του κάθε πολιτισμού]
- Idea# 48: Trips and travels should be organised to get to know different cultures. [Να οργανώνονται εκδρομές ή ταξίδια για γνωριμία διαφορετικών πολιτισμών]

In particular, Idea #1 ('to have a flexible school curriculum according to the composition of the school'), constituting the only idea on the eighth level of the tree, has proven to be the most influential. If the school curriculum was more flexible, schools could react better and in a more flexible way to new challenges, to a raising number of foreign students, or would simply have more possibilities to include actions related to multiculturalism at their school. **It is of course interesting to observe that the most influential idea is beyond the teachers', parents' and students' control, whereas those ideas on level six and seven can be tackled by the school community itself.**

Another influential idea is Idea # 20 ('the parents' associations and the teaching staff will be from many countries'). Although in a discussion many agreed that also this idea is not in the school community's hand, steps could be taken to make progress in increasing the number of non-Cypriot parents within the parents' association by specifically inviting non-Cypriot parents to join and to participate.

Idea # 47 ('a hall for multiple purposes should be created, which will serve the needs of each culture') was a much discussed idea which shows to have influence on many other ideas on higher levels, offering space for activities and events at the school premises. However, scepticism was

high that this idea can be realised by the school community. However, possibilities of sponsoring and funding can be explored and even a rather small space might be created and might serve as a incubator for many ideas promoting multiculturalism at the school and in the classroom.

In general the teachers, parents and students can tackle many of the ideas that turned out as most influential.

B. Obstacles to the Ideal Multicultural School

During the second session of the workshop (03 and 16 November), the participants engaged in a structured dialogue focusing on the triggering question:

What obstacles hinder us from materializing the ideal school of a multicultural European Cyprus?

[Ποιά εμπόδια μας δυσκολεύουν να δημιουργήσουμε το ιδανικό σχολείο μιας πολυ-πολιτισμικής Ευρωπαϊκής Κύπρου;]

The participants of the co-laboratory collected a total of 76 factors hindering the ideal multicultural school from being materialized. All factors are listed in Table 4. As time was limited, Mrs. Stella Gabriel together with the students clustered all ideas in between the two dates of the second session. The following eleven clusters were formed:

Cluster 1: Education [Παιδεία]

Cluster 2: Fear [Φόβος]

Cluster 3: Racism [Ρατσισμός]

Cluster 4: Time [Χρόνος]

Cluster 5: Ministry [Υπουργείο]

Cluster 6: Cypriot Society [Κυπριακή Κοινωνία]

Cluster 7: Religion [Θρησκεία]

Cluster 8: Buildings [Κτίρια]

Cluster 9: Schools [Σχολεία]

Cluster 10: Other Countries [Άλλες Χώρες]

Cluster 11: Various [Διάφορα]

The clusters and all the ideas included in each of them can be found in Table 5.

Having classified all factors according to the clusters, all participants voted for their five most favorable factors. As in the first phase of the workshop, the votes were widely spread among most of the factors. The factors that received most votes were:

Factor# 10 (11 votes):

Factor# 1 (5 votes):

Factor# 3 (4 votes):

Factor# 5 (4 votes):

Factor# 11 (4 votes):

Factor# 48 (4 votes):

In addition to the above, Factors # 6, 7, 23, 26, 28, 29, 32, 37, 58, 67, 71, 73 received one or more votes and were structured in the influence tree.

The voting results were used to select the most influential factors for the subsequent structuring process. The participants managed to structure 18 factors that received one or more votes and were selected important according to their interrelations. The influence tree created (Table 6) shows the root causes hindering the materialization of the ideal multicultural school. The influence map consists of six different levels of influence.

How to read the Influence Tree

The second tree of influence that was created shows six different levels of influence. As noted above, the factors at the bottom are considered to be most influential. Making progress or achieving results in those bottom ideas makes it a lot easier to address those that lie higher in the map.

In summary, almost all participants approved that the following factors are the most influential and agreed that further actions must take these ideas into account:

Factor# 5: Ministry of Education [Υπουργείο Παιδείας]

Factor# 6: Centralized educational system [Συγκεντροτικό Εκπαιδευτικό σύστημα]

Factor# 11: There is no flexibility in the school curriculum [Δεν υπάρχει ανάλογη ευελιξία στο αναλυτικό πρόγραμμα]

Factor# 28: Lack of respect [Έλειψη αλληλοσεβασμού]

Even more than in the first map, the second tree of influence shows the root causes of the obstacles to an ideal multicultural school beyond the immediate school community's control. Factors #5, 6 and 11, which constitute level six and level five of the tree, are outside factors and are not within immediate reach by the school community. However, Factor #28 ('lack of respect') can be addressed by teachers and parents and can be tackled in the classroom. Another influential factor is #58 ('the adults who are in power don't take the youngsters' opinions into consideration'), which indicates that those who decide do not necessarily take the students' needs into account when forming their decisions.

In sum, a large number of obstacles is allocated outside of the school community and can not be tackled easily. However, progress can be made and factors can be addressed that might not be the root cause, but yet contribute to an overall improvement of the situation and contribute to ease the way for a multicultural school.

C. Action Plan for a multicultural School

17 OF THE PARTICIPANTS MET FOR A WORKSHOP ON 26 JANUARY, 2008 TO DESIGN AN ACTION PLAN TOWARDS A MULTICULTURAL SCHOOL.

DURING THIS WORKSHOP, A TOTAL OF 15 ACTIONS WERE DESIGNED AND PRIORITISED.

ONE ACTION GROUP WAS ALLOCATED TO EACH OF THE ACTIONS, RESPONSIBLE FOR THE COORDINATION AND IMPLEMENTATION OF THAT ACTION. THE FOLLOWING 15 ACTIONS HAVE BEEN DESIGNED FOR IMPLEMENTATION WITH THE SUPPORT OF THE FUTURE WORLDS CENTER AND THE PROJECT 'BUILDING A MULTI-NATIONAL AND MULTI-ETHNIC CYPRUS TO PROMOTE EUROPEAN VALUES AND REGIONAL AND INTERNATIONAL PEACE':

1. It is not easy to teach the native language if there is no teacher to teach it. We need to find a teacher who can teach it.

Δεν είναι εύκολο να διδάσκεται η μητρική γλώσσα αν δεν υπάρχει ο δάσκαλος να τη διδάξει. Να βρούμε δάσκαλο που να μπορεί να διδάξει.

2. To create a committee that includes teachers, parents, children, mayors, volunteers, so that their ideas can be heard especially at the Ministry of education.

Να συσταθεί νέα επιτροπή από εκπαιδευτικούς, γονείς, παιδιά, δημάρχους, εθελοντές ώστε να μπορούν να ακουστούν οι ιδέες ειδικά στο Υπουργείο Παιδείας.

3. There should be a welcoming class that is constituted of psychologists, teachers, health visitors for children that speak a different language in order to prepare them.

Να υπάρξει τάξη υποδοχής που να αποτελείται από ψυχολόγους, εκπαιδευτικούς, επισκέπτες υγείας, για αλλόγλωσσα παιδιά που να προετοιμάζει τα παιδιά.

4. To draw on the walls of the school the customs of other countries in order to learn better.

Να αναλάβουμε να ζωγραφίσουμε στους τοίχους του σχολείου έθιμα άλλων χωρών ώστε να μάθουμε καλύτερα.

5. To organize acquaintance weeks with civilizations that the children from the school come from.

Να οργανώσουμε εβδομάδες γνωριμίας με πολιτισμούς από τους οποίους προέρχονται παιδιά του σχολείου μας.

6. To buy literary books the native language of the foreign children. Help from **the relative embassy**.

Αγορά λογοτεχνικών βιβλίων στη μητρική γλώσσα των αλλόγλωσσων

- παιδιών. Βοήθεια ανάλογης πρεσβείας.
7. Welcoming of the children of other countries in the form of a festivity with traditional games.
Υποδοχή παιδιών από άλλες χώρες υπό μορφή γιορτής, με παραδοσιακά παιχνίδια.
 8. Team of parents, teachers, volunteers, knowers of European programs for further financing.
Ομάδα γονέων, εκπαιδευτικών, εθελοντών, γνώστες των ευρωπαϊκών προγραμμάτων για περαιτέρω χρηματοδότηση.
 9. Weekly import of toys from different countries
Εβδομαδιαία εισαγωγή παιχνιδιών από διάφορες χώρες
 10. Operation of an acquaintance program between the children
Λειτουργία προγράμματος γνωριμίας μεταξύ των παιδιών
 11. Make the children feel comfortable but not in a provocative way
Όχι προκλητικός τρόπος για να κάνουμε τα παιδιά να αισθάνονται άνετα
 12. In the frames of the domestic economy class, preparation of recipes and food. Multicultural **kitchen**.
Στα πλαίσια μαθήματος οικιακής οικονομίας, ετοιμασία συνταγών και φαγητών. Πολύ-πολιτισμική κουζίνα.
 13. Organization of weekly acquaintance events with the different cultures of the children
Οργάνωση εβδομάδας εκδηλώσεων γνωριμίας με τους πολιτισμούς των παιδιών
 14. Psychologists for the children and parents. Organize of speeches, series of classes.
Ύπαρξη ψυχολόγων για τα παιδιά και τους γονείς. Οργάνωση διαλέξεων, σειρά μαθημάτων.
 15. Briefing the Ministry of Education for the results and the responsibility that can undertake. Briefing of **the parents**.
Ενημέρωση Υπουργείου Παιδείας για τα αποτελέσματα και την ευθύνη που μπορεί να αναλάβει. Ενημέρωση γονέων.

Intercultural Cooking Day

On 7 March, parents from six different countries prepared traditional recipes for all pupils. The pupils had the opportunity to taste food from Sweden,

Palestine, Ukraine, Finland, England, and Cyprus. All pupils received copies of the recipes.

Intercultural activities during the lessons

Together with the project team, the teachers gathered various intercultural and interactive exercises, using internet resources such as SALTO and COMPASS, and integrated them into the different lessons.

Painting of the School Walls

The teachers and students painted parts of the walls around the school yard. They painted colourful children as well as the sentence 'All Different – All Equal' to demonstrate that all pupils are equal no matter how different they are.

Intercultural activities during the lessons

Intercultural Games

Pupils went through the different classes and collected different games from various countries. During the Physical Education class, pupils learned and practiced the games, and also learned short phrases in the various languages necessary to play the games as they are played in the country they come from. One morning was then dedicated to the intercultural games and the pupils had the opportunity to play all the games in the school yard.

Conclusions

The aims of the co-laboratories were satisfied in the following ways:

1. Two extensive lists of ideas and factors were generated in response to the Triggering Questions;
2. The ideas and factors were clarified in plenary thus enabling participants achieve a better understanding of the views of other members of the Consortium as well as to greatly expand their own horizon regarding the breadth and depth of issues which need to be taken into account;
3. The ideas and factors were clustered in an interactive manner, thus providing opportunities for further and deeper clarifications of salient distinctions between separate ideas. This process is crucial for what we call “evolutionary learning” (i.e., during the process participants “loose” connection to their own personal ideas and stereotypes in favor of a collective, and shared thinking;
4. Participants voted for the ideas and factors that they considered most important. They subsequently managed to “structure” all these ideas and produce one influence map for each Triggering Question. It must be noted that co-laboratories rarely manage to “structure” all ideas that receive votes;
5. An influence map has been produced per Triggering Question, the first contains 26 ideas, and the second contains 18 factors in the form of a tree of influence;
6. The participants had time to discuss the influence maps and in general agreed that the arrows in the map made sense to them.

Although some of the most influential ideas and factors are beyond the power and capabilities of the school, several of the other ideas can be put into practice without major difficulties. The follow-up workshop and the actions implemented proof that a transformation of the school is possible. Students, parents and pupils have been working together to promote multiculturalism and will continue to do so during the next school year.
