

Building a Multi-Ethnic and Multi-National Cyprus

**Building a Multicultural School: Report of a
Structured Dialogue Co-laboratory**

**Highgate School Nicosia
03, 04, 14 April 2008**

Author: Kerstin Wittig
Editor: Yiannis Laouris

This booklet was prepared in the context of the project '**Building a Multi-Ethnic and Multi-National Cyprus to promote European Values and Regional and International Peace**'.

The main objective of the project is to promote awareness and increase the sensitivity of the Cypriot Society on how a multi-ethnic and multi-cultural Cyprus serves European values and promotes regional and international peace.

To meet the main objective, the project engaged students, teachers and parents in workshops and activities to create a vision map for a multi-cultural and multi-ethnic Cyprus, as well as visualize and implement specific activities, which contribute towards materializing the vision for a multi-cultural society.

The coordinating organization of this project is the Future Worlds Center (legal reg.: Cyprus Neuroscience and Technology Institute), based in Nicosia. The project's partner organizations are: the Cyprus Adult Education Association, the Human Rights and Education Network, the University of Cyprus (Department for Political Sciences), and the Young Cypriot Scientists Network.

The project is part of UNDP's initiative Action for Cooperation and Trust (ACT), which receives support from the American people through a grant from USAID.

The contents of this document are the sole responsibility of the Future Worlds Center (legal reg.: Cyprus Neuroscience and Technology Institute) and can under no circumstances be regarded as reflecting the position of UNDP. The views expressed in this publication are those of the author(s) and do not necessarily represent those of the United Nations or its Member States, UNDP or USAID.

The participants, i.e., the teachers, parents and students of the Highgate School in Nicosia, are the primary and only authors of the views expressed in this document.

Introduction

This structured interactive workshop, hereafter called “co-laboratory” was organized as part of the project “Building a Multi-Ethnic and Multi-National Cyprus to promote European Values and Regional and International Peace.” The main aim of the project is to promote awareness and increase the sensitivity of the Cypriot society on how a multi-ethnic and multicultural Cyprus serves European values and promotes regional and international peace. The project engages students, teachers and parents in Structured Dialogic Design Process (SDDP) co-laboratories (i.e., interactive workshops in which participants define the content of the dialogue) and activities to create a “vision map” for a multicultural and multi-ethnic Cyprus, as well as visualize and implement specific activities, which contribute towards materializing the vision for a multi-cultural society.

The workshop at the Highgate School in Nicosia was organized on the 3rd, 4th and 14th April thanks to the enthusiastic and constructive support of Mrs. Eva Argyrou.

Acknowledgements

The Facilitation Team that organized the SDDP co-laboratories would like to thank the teachers and the headmistress of the Highgate School of Nicosia, and the participating parents. The Facilitation Team would like to especially thank the students for their participation, their enthusiastic contributions, time, energy and expertise they brought to the dialog.

All 17 participants were willing to commit the necessary time and to work together to develop a shared understanding of the obstacles they experience in their daily school life. Moreover they managed to envision an ideal future. Their hard work, perseverance and humour made the workshop’s experience both richly diverse and productive.

Methodology: Structured Dialogic Design Process

The Structured Dialogic Design Process (SDDP) is a methodology that supports democratic and structured dialogue among a group of stakeholders. It is especially effective in resolving multiple conflicts of purpose and values, and in generating consensus on organizational and inter-organizational strategy. It is scientifically grounded on 7 laws of cybernetics/systems science and has been rigorously validated in hundreds of cases throughout the last 30 years.

The Future Worlds Center team has extensive experience in the application of the method. They have used it in many forums to facilitate organizational and social change. For example, they have used it in three large European networks of experts (Cost219ter¹, Cost298², Insafe³ and the UCYVROK project⁴).

The SDDP is specifically designed to assist inhomogeneous groups in dealing with complex issues, in a reasonably limited amount of time. It enables the integration of contributions from individuals with diverse views, backgrounds and perspectives through a process that is structured, inclusive and collaborative.

A group of participants, who are knowledgeable of the particular situation are engaged in collectively developing a common framework of thinking based on consensus and shared understanding of the current or future ideal state of affairs. The SDDP promotes focused communication among the participants in the design process and their ownership of and commitment in the outcome.

-
- 1 The Cost219ter is a network of experts from 20 countries (18 European plus USA and Australia) who are concerned on how broadband technologies and next-generation networks will make services more accessible and more transparent (ambient intelligence) to all. The Cost219ter community has used SDDP to define the obstacles that prevent practical broadband applications being produced and exploited. Based on the results of the structured dialogue, they developed their strategy for the next 3 years.
 - 2 The Cost298 is a network of experts like the Cost219ter, which focuses on Broadband technologies for all.
 - 3 Insafe is a network of 27 safer Internet Awareness Nodes throughout Europe. They used SDDP in many of their meetings to identify obstacles, develop vision and agree on action plans. The Cypriot node is at www.CyberEthics.info. These reports are on line.
 - 4 The SDDP methodology was used to facilitate dialogue between Greek and Turkish Cypriots since 1994. This dialogue culminated to the formation of an embryonic peace movement. A number of publications are available.

Structure and Process in a typical SDDP Co-Laboratory

When facing any complex problem the stakeholders can optimally approach it in the following way:

1. Develop a shared vision of an ideal future situation. This ideal **vision map** serves as a **magnet** to help the social system transcend into its future state.
2. Define the **problematique**, also known as the wall of inhibitors i.e., develop a common and shared understanding of what are the obstacles that prevent the stakeholders' system from reaching its ideal state.
3. Define **actions/options** and produce a roadmap to achieve the goals.

The three phases are implemented using exactly the same dialogue technique. Each phase leads to similar products:

1. A **list** of all ideas and their clarifications [SDDP is a self-documenting process].
2. A **cluster** of all ideas categorized according to their common attributes [using a bottom-up approach].
3. A document with the **voting results** in which participants are asked to choose ideas they consider most important [erroneous priority effect = most popular ideas do not prove to be the most influential!]
4. A **map** of influences. This is the most important product of the methodology. Ideas are related according to the influence they exert on each other. If we are dealing with problems, then the most influential ideas are the **root causes**. Addressing those will be most efficient. If we deal with factors that describe a future ideal state, then working on the most influential factors means that achieving the final goal will be easier/faster/more economic, etc.

In the following, the process of a typical SDDP session, with its phases, is described in more detail.

First The breadth of the dialogue is constrained and sharpened with the help of a **triggering question**. This is formulated by a core group of people, who are the Knowledge Management Team (KMT) and is composed by the owners of the complex problem and SDDP experts. This question can be emailed to all participants, who are requested to respond with at least three contributions before the meeting either through email or wikis.

Second All contributions/responses to the triggering questions are recorded in the *Cogniscope II* software. They must be short and concise: one idea in one sentence! The authors may clarify their ideas in a few additional sentences.

Third The ideas are clustered into categories based on similarities and common attributes if time is short. A smaller team can do this process to reduce time (e.g., between plenary sessions).

Forth All participants get five votes and are asked to choose ideas that are most important to them. Only ideas that receive votes go to the next and most important phase.

Fifth In this phase, participants are asked to explore influences of one idea on another. They are asked to *decide whether solving one problem will make solving another problem easier*. If the answer is a great majority an influence is established on the map of ideas. The way to read that influence is that items at the bottom are root causes (if what is being discussed are obstacles), or most influential factors (if what is being discussed are descriptors of an ideal situation or actions to take). Those root factors must be given priority.

Sixth Using the root factors, stakeholders develop an efficient strategy and come up with a road map to implement it.

A. Vision of an Ideal Multicultural School

During the first session of the co-laboratory, the participants engaged in a structured dialogue focusing on the triggering question:

What are characteristics of an ideal multicultural school?

The participants of the interactive co-laboratory collected a total of 75 descriptors characterizing the ideal school. All descriptors can be found in *Table 1*. In the next step, a smaller group of the participants clustered all ideas. The following four clusters were formed:

- Cluster 1: Curriculum
- Cluster 2: Community
- Cluster 3: Events and Activities
- Cluster 4: Policies

The clusters and all the descriptors included in each of them can be found in *Table 2*.

Having classified all ideas according to the clusters, all participants voted for their five most favorable descriptors. The votes were widely spread among most of the descriptors. The descriptors that received the most votes were:

- Descriptor# 52 (6 votes): Encouraging listening and tolerance of different views
- Descriptor# 19 (4 votes): Open minded teachers from different cultural backgrounds
- Descriptor# 29 (4 votes): Bullying control in a multicultural manner
- Descriptor# 41 (4 votes): A multi cultural school should have students who are comfortable and not intimidated to announce their religion, culture or nationality
- Descriptor# 74 (4 votes): Don't impose your political ideas on other students

Furthermore, the following Descriptors received one or more votes and were structured in the next step: Descriptors# 8, 13, 23, 23, 26, 43, 25, 35, 42 58, 72.

The voting results were used to select ideas for the subsequent structuring process. The participants managed to "structure" all 19 descriptors that received one or more votes. Here the word "structure" means that the participants explored the relations between two ideas at a time. This resulted in the creation of what is called 'a tree of influences'. The interpretation of the tree is discussed in the next section.

Tree of Influence

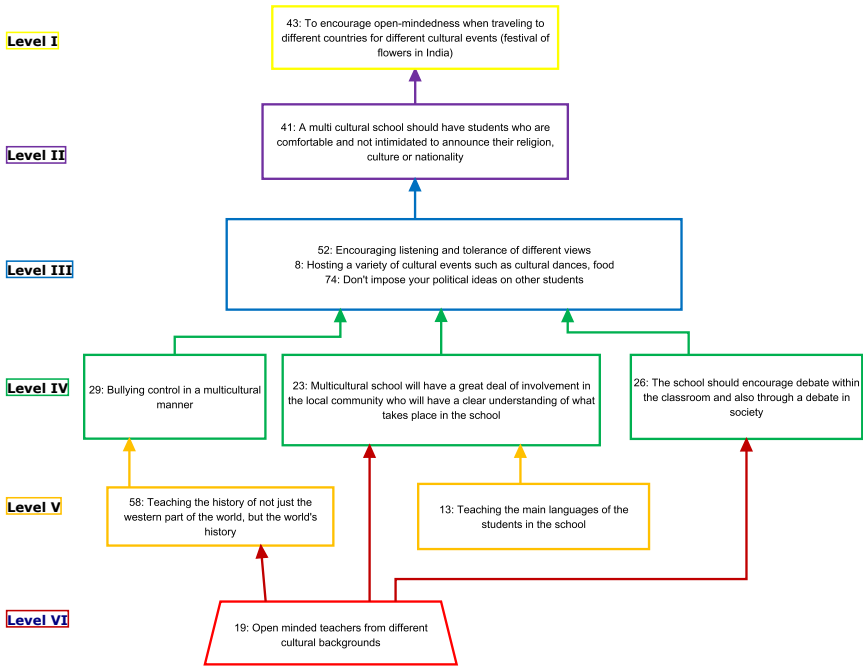

The highly complex 'tree of influence', also referred to as an 'influence map' consists of six different levels of influence. Descriptors at the bottom are considered to be the most influential. Making progress or achieving results in the bottom descriptors makes it a lot easier to address those that lie higher in the map.

In summary, almost all participants agreed that the following ideas are the most influential and agreed that further actions must take these ideas into account:

- Descriptor# 19: Open minded teachers from different cultural backgrounds
- Descriptor# 20: Having the freedom to discuss different ideas from different cultures
- Descriptor# 13: Teaching the main languages of the students in the school
- Descriptor# 58: Teaching the history of not just the western part of the world, but the world's history

In particular, Descriptor# 19 *Open minded teachers from different cultural backgrounds* and Descriptor# 20 *Having the freedom to discuss different ideas from different cultures* constituting the descriptors on the sixth (the deepest) level of the tree, turned out to be the most influential. Great emphasis is put on the selection of the teachers and their influence within the classroom and school. Moreover, the atmosphere created in the school has been considered by the participants to be particularly influential. Having open-minded teachers and being in an environment which encourages the freedom to discuss different cultures has proven essential to achieving a multicultural school. Interestingly, during their discussions, the participants noted that teachers at Highgate School are already open-minded, and therefore, progress has been made in their school with regard to the most influential descriptor.

Vision of an Ideal Multicultural School: Tree of Influence

Two other influential descriptors are Descriptor# 13 *Teaching the main languages of the students in the school* and Descriptor# 58 *Teaching the history of not just the western part of the world but the world's history*. These two descriptors refer to the actual teaching in the school and to the subjects that are taught. Participants agree that teachers' training plays a very influential role in the shaping of the school and the way multiculturalism is promoted. Even though the most influential descriptors are not within the direct influence of the school, the students, parents, and teachers, many other vision descriptors can be addressed and tackled by the school and the school community itself.

B. Obstacles to the Ideal Multicultural School

During the second and third session of the co-laboratory (04 and 14 April), the participants engaged in a structured dialogue focused on the triggering question:

What obstacles do we face in our efforts to create an ideal multicultural school?

The participants of the co-laboratory collected a total of 76 factors hindering the ideal multicultural school from being materialized. All factors are listed in *Table 3*. The following six clusters were formed:

Cluster 1: Resources and Training

Cluster 2: Community

Cluster 3: Relationships

Cluster 4: Policy

Cluster 5: Political

Cluster 6: Curriculum

The clusters and all the ideas included in each of them can be found in *Table 4*.

Having classified all factors according to the clusters, all participants voted for their five most favorable factors. As in the first phase of the workshop, the votes were widely spread among most of the factors. The factors that received most votes were:

- Factor# 3 (9 votes): The economic problem of the school
- Factor# 44 (6 votes): Fear and lack of willingness to change
- Factor# 9 (5 votes): The actual premises of the school
- Factor# 17 (5 votes): Poor leadership
- Factor# 60 (5 votes): Fear of consequence
- Factor# 11 (4 votes): The existing stereotypes

In addition to the above, Factors # 2, 7, 13, 21, 22, 23, 32, 33, 34, 40, 44, 45, 54, 58, 69, 70, and 74 received one or more votes and were structured in the influence tree. The voting results were used to select the most influential factors for the subsequent structuring process. The participants managed to structure all 23 factors that received one or more votes and were selected important according to their interrelations. The influence tree created (*Table 6*) shows the root causes hindering the materialization of the ideal school. The influence map consists of seven different levels of influence.

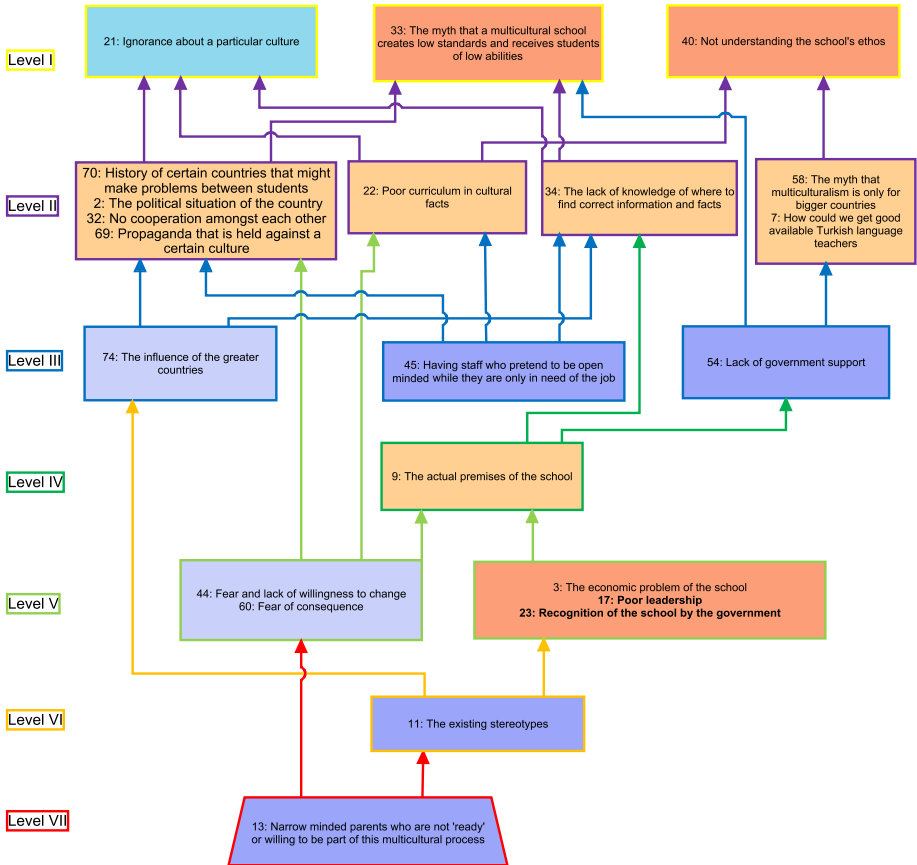

Root Cause Map

The resulting tree is called also the Root Cause Map. It consists of seven different levels. The factors (obstacles) at the bottom are considered to be the root causes and they have most influence on the items that lie above them. Making progress in addressing or removing the obstacles that lie at the bottom of the tree makes it a lot easier to address those that lie higher in the map.

In summary, almost all participants approved that the following factors are the most influential and agreed that further actions must address these root causes satisfactorily:

- Factor# 13: Narrow minded parents who are not 'ready' or willing to be part of this multicultural process
- Factor# 11: The existing stereotypes
- Factor# 44: Fear and lack of willingness to change
- Factor# 60: Fear of consequence
- Factor# 3: The economic problem of the school
- Factor# 17: Poor leadership
- Factor# 23: Recognition of the school by the government

Obstacles to the Ideal Multicultural School: Tree of Influence

The results of the obstacle root cause map indicate that the major obstacles in achieving the vision lie within the school community, people's attitude, and perception. The most influential factor, the 'root' is: Factor# 13: *Narrow minded parents who are not 'ready' or willing to be part of this multicultural process.* Participants agree that parents play a very crucial role in promoting multiculturalism, as children adopt and are influenced by attitudes, prejudices and perceptions of their parents. Along with the root obstacles, the following ones also indicate the need for a transformation on the personal and inter-personal level: *The existing stereotypes, Fear and lack of willingness to change, and Fear of consequence.* These are obstacles that cannot be transformed easily, however, students, parents, and teachers can collaborate to tackle them and there are many possibilities within the school environment to work on issues such as stereotypes and fears. *Poor leadership* (Factor# 17) is a topic more difficult to address, but could be done through trainings. Only Factor# 3: *The economic problem of the school* and Factor# 23: *Recognition of the school by the government* are outside of the school's immediate control.

In sum, progress can be made on different levels and several factors can be addressed through a range of activities, involving teachers, students, and the parents to contribute to an even more open and inclusive school.

Conclusions

The aims of the co-laboratories were satisfied in the following ways:

1. Two extensive lists of ideas and factors were generated in response to the Triggering Questions;
2. The ideas and factors were clarified in the plenary session, thus enabling participants to achieve a better understanding of the views of other members of the Consortium as well as to greatly expand their own horizon regarding the breadth and depth of issues which need to be taken into account;
3. The descriptors and factors were clustered in an interactive manner, thus providing opportunities for further and deeper clarifications of salient distinctions between separate ideas. This process is crucial for what we call "evolutionary learning" (i.e., during the process participants "loose" connection to their own personal ideas and stereotypes in favor of a collective, and shared thinking);
4. Participants voted for the ideas and factors that they considered most important. They subsequently managed to "structure" all these ideas and produce one influence map for each Triggering Question. It must be noted that co-laboratories rarely manage to "structure" all ideas that receive votes;
5. An influence map has been produced per Triggering Question, the first contains 19 descriptors, and the second contains 23 factors in the form of a tree of influence;
6. The participants had time to discuss the influence maps and in general agreed that the arrows in the map made sense to them.

Further to the above, the participants and the facilitation team agreed to gather once again and develop an Action Plan towards building a more inclusive multicultural school, based on the two influence maps created in their interactive co-laboratory sessions. Although some of the most influential ideas and factors are beyond the power and capabilities of the school, they noted that several of the other ideas can be put into practice without major difficulties.

It is the goal of their next meeting (s) and workshop (s) to identify those factors and ideas and to decide with what means they will address them. They also brought up the issue of under whose responsibility and in which timeframe these factors will be put into action. The facilitation team and their organization agreed to support the teachers, parents, and students and offer their facilitation services when needed.

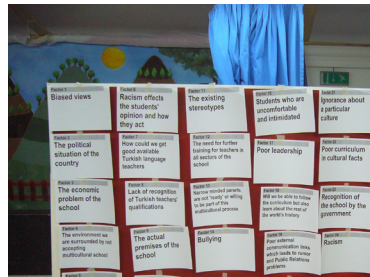

Table 1 – Vision of an Ideal Multicultural School: List of all Descriptors

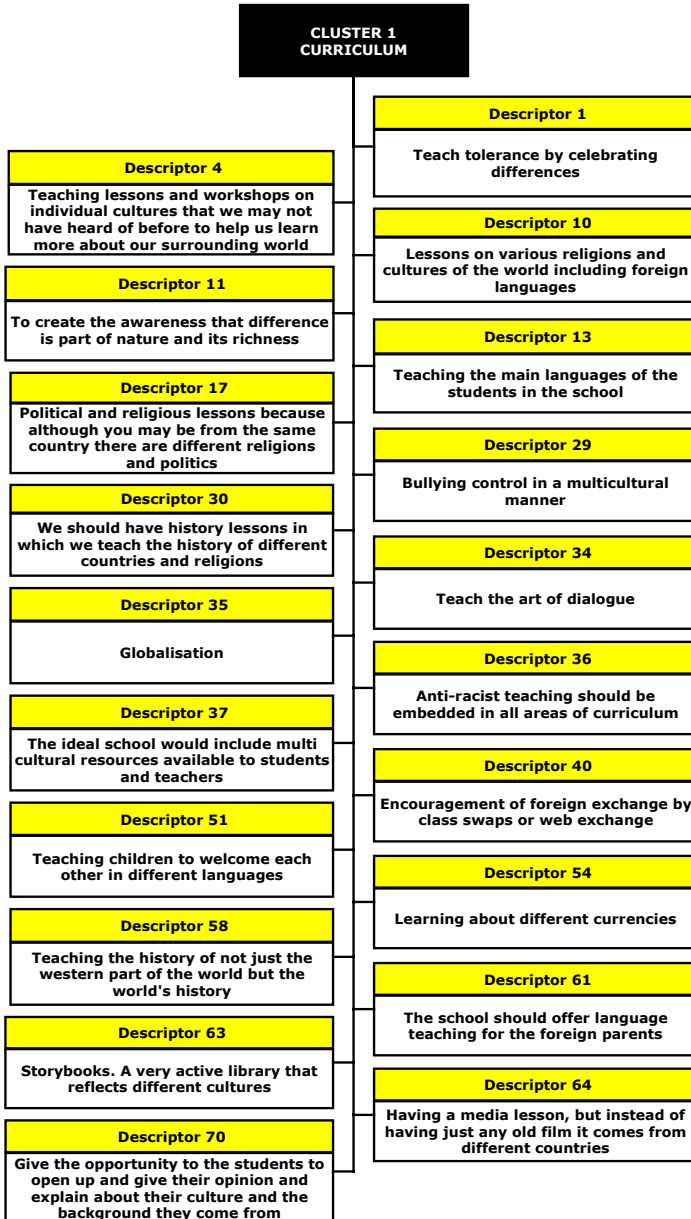

1. Teach tolerance by celebrating differences
2. Openness. Being open to all cultures, religions and ideas
3. Promoting tolerance in different ethnic backgrounds
4. Teaching lessons and workshops on individual cultures that we may not have heard of before to help us learn more about our surrounding world
5. To be kind and polite with others and help them
6. Teachers from different cultures
7. We need to prevent racism
8. Hosting a variety of cultural events such as cultural dances, food
9. Celebrating the different festivals that each person in this school has by having different nights
10. Lessons on various religions and cultures of the world including foreign languages
11. To create the awareness that difference is part of nature and its richness
12. Respect the cultures and the thoughts of others
13. Teaching the main languages of the students in the school
14. The ideal school teaches acceptance regardless of history and conflict
15. Cultural exchange. Encouraging interest in all areas of culture and ethnicity
16. Extending the multicultural principle outside of the school by inviting the families to participate in social clubs
17. Political and religious lessons because although you may be from the same country there are different religions and politics
18. We should have not only teachers from around the world but also students from around the world

19. Open minded teachers from different cultural backgrounds
20. Having the freedom to discuss different ideas from different cultures
21. A multicultural school helps students learn how to synthesise difference in a way that will create benefits for all concerned and for society as a whole
22. Learn to live and accept the differences
23. Multicultural school will have a great deal of involvement in the local community, which will have a clear understanding of what takes place in the school
24. An ideal multicultural school enhances sensitivities to manners of cultural exchange
25. Cultural and artistic workshops that include dance, song, art and film
26. The school should encourage debate within the classroom and also through a debate in society
27. Events in which classes work together expressing different countries' cultures through dances, research and other things
28. To be confident in what you do even if you come from a different country
29. Bullying control in a multicultural manner
30. We should have history lessons in which we teach the history of different countries and religions
31. Politics should not be discussed
32. Involvement in different organisations from all around the world
33. Having students from different nationalities feeling like a big family with close relationships
34. Teach the art of dialogue
35. Globalisation
36. Anti-racist teaching should be embedded in all areas of curriculum
37. The ideal school would include multi cultural resources available to students and teachers

38. The people within a multi cultural school should reflect the multi ethnic backgrounds
39. Intercommunal and international forums
40. Encouragement of foreign exchange by class swaps or web exchange
41. A multi cultural school should have students who are comfortable and not intimidated to announce their religion, culture or nationality
42. To respect others
43. To encourage open-mindedness when travelling to different countries for different cultural events (festival of flowers in India)
44. We should have trips to different religious places
45. Open communication amongst all parties involved including parents
46. Travelling to different countries and involvement in activities in sports among the other schools
47. Discourage hooliganism
48. Partake in the cultural life of each cultural group
49. Songs and dances of other nations and cooking together
50. Taking cultural customs into account and incorporating them into the classrooms
51. Teaching children to welcome each other in different languages
52. Encouraging listening and tolerance of different views
53. Social and emotional support through counselling and student mentoring
54. Learning about different currencies
55. Parental involvement through cultural activities
56. Encourage students to be broad minded by not relying on one sided information
57. Initially protecting the less numerous or weakest cultural groups
58. Teaching the history of not just the western part of the world but the world's history

59. Showing multi culturality by having an art project from a different country every fortnight
60. We should have traditional activities from different countries
61. The school should offer language teaching for the foreign parents
62. Provide translators to facilitate communications among people from different cultures
63. Storybooks. A very active library that reflects different cultures
64. Having a media lesson, but instead of having just any old film it comes from different countries
65. Help create awareness that we are a multi cultural school
66. Have exhibitions to show, for example, clothes or art from different cultures
67. Need broadminded teachers so they can encourage students to follow their example
68. Flags, art, famous pictures of people, maps of different countries to be exhibited in the school of the students who are in the school
69. An elected council that has one student representative from each country
70. Give the opportunity to the students to open up and give their opinion and explain about their culture and the background they come from
71. The school might be able to recommend a support group network to help with the transitions into the new community
72. The private education sector should have an organisation that represents its views and needs at a ministerial level
73. School could invite personalities from different countries or cultures to talk about the culture that they represent
74. Don't impose your political ideas on other students
75. Each week there could be a parent cooking a different dish from their country.

Table 2 - Vision of an Ideal Multicultural School: Clusters

**CLUSTER 2
COMMUNITY**

Descriptor 15

Cultural exchange. Encouraging interest in all areas of culture and ethnicity

Descriptor 16

Extending the multicultural principle outside of the school by inviting the families to participate in social clubs

Descriptor 23

Multicultural school will have a great deal of involvement in the local community who will have a clear understanding of what takes place in the school

Descriptor 26

The school should encourage debate within the classroom and also through a debate in society

Descriptor 45

Open communication amongst all parties involved including parents

Descriptor 62

Provide translators to facilitate communications among people from different cultures

Descriptor 71

The school might be able to recommend a support group network to help with the transitions into the new community

Descriptor 72

The private education sector should have an organisation that represents its views and needs at a ministerial level

**CLUSTER 3
EVENTS AND ACTIVITIES**

Descriptor 9
Celebrating the different festivals that each person in this school has by having different nights

Descriptor 27
Events in which classes work together expressing different countries cultures through dances, research and other things

Descriptor 39
Intercommunal and international forums

Descriptor 44
We should have trips to different religious places

Descriptor 48
Partake in the cultural life of each cultural group

Descriptor 55
Parental involvement through cultural activities

Descriptor 60
We should have traditional activities from different countries

Descriptor 68
Flags, art, famous pictures of people, maps of different countries to be exhibited in the school of the students who are in the school

Descriptor 73
School could invite personalities from different countries or cultures to talk about the culture that they represent

Descriptor 8
Hosting a variety of cultural events such as cultural dances, food

Descriptor 25
Cultural and artistic workshops that include dance song, art, and film

Descriptor 32
Involvement in different organisations from all around the world

Descriptor 43
To encourage open-mindedness when traveling to different countries for different cultural events (festival of flowers in India)

Descriptor 46
Traveling to different countries and involvement in activities in sports among the other schools

Descriptor 49
Songs and dances of other nations and cooking together

Descriptor 59
Showing multi culturality by having an art project from a different country every fortnight

Descriptor 66
Have exhibitions to show, for example, clothes or art from different cultures

Descriptor 69
An elected council that has one student representative from each country

Descriptor 75
Each week there could be a parent cooking a different dish from their country

**CLUSTER 4
POLICIES**

Descriptor 3
Celebrating the different festivals that each person in this school has by having different nights

**CLUSTER 4
POLICIES**

Descriptor 47

Discourage hooliganism

Descriptor 50

Taking cultural customs into account and incorporating them into the classrooms

Descriptor 52

Encouraging listening and tolerance of different views

Descriptor 53

Social and emotional support through counseling and student mentoring

Descriptor 56

Encourage students to be broad minded by not relying on one sided information

Descriptor 57

Initially protecting the less numerous or weakest cultural groups

Help create awareness that we are a multi cultural school

Descriptor 67

Need broadminded teachers so they can encourage students to follow their example

Descriptor 74

Don't impose your political ideas on other students

Table 3 – Obstacles to the Ideal Multicultural School: List of all Factors

1. Biased views
2. The political situation of the country
3. The economic problem of the school
4. The environment we are surrounded by not accepting multicultural school
5. No funds for organising and paying for different events such as festivals, dances, etc.
6. Racism affects the students' opinion and how they act
7. How could we get good available Turkish language teachers
8. Lack of recognition of Turkish teachers' qualifications
9. The actual premises of the school
10. Lack of interactive resources
11. The existing stereotypes
12. The need for further training for teachers in all sectors of the school
13. Narrow minded parents who are not 'ready' or willing to be part of this multicultural process
14. Bullying
15. Having closed minded members of staff
16. Students who are uncomfortable and intimidated
17. Poor leadership
18. Will we be able to follow the curriculum but also learn about the rest of the world's history
19. Poor external communication links which leads to rumor and Public Relations problems
20. Isolation of the school
21. Ignorance about a particular culture
22. Poor curriculum in cultural facts

23. Recognition of the school by the government
24. Racism
25. People not respecting each other
26. Students who are unwilling to go through this multicultural process
27. Will students be willing to learn other languages
28. Will we be able to fit in all the extra multicultural activities into an already busy timetable
29. Lack of funds for exchange with other schools from other countries
30. Identifying which cultures or religions will be investigated
31. Media might influence and focus on the negative aspect of the country or culture and that can influence views coming into the school
32. No cooperation amongst each other
33. The myth that a multicultural school creates low standards and receives students of low abilities
34. The lack of knowledge of where to find correct information and facts
35. Poor external support
36. Allowing religious classes to be taught but not just the religion of the country but other countries religions as well
37. Not enough multicultural pictures and posters etc,
38. Lack of public resources
39. How to find teachers that can actually teach us about cultural dances and other aspects
40. Not understanding the school's ethos
41. Bad relationship with the neighbourhood and local authorities
42. Lack of training and assisting staff in integrating multiculturalism
43. Students are not sensitized to receive different forms of physical expression and interaction
44. Fear and lack of willingness to change
45. Having staff who pretend to be open-minded while they are only in need of the job

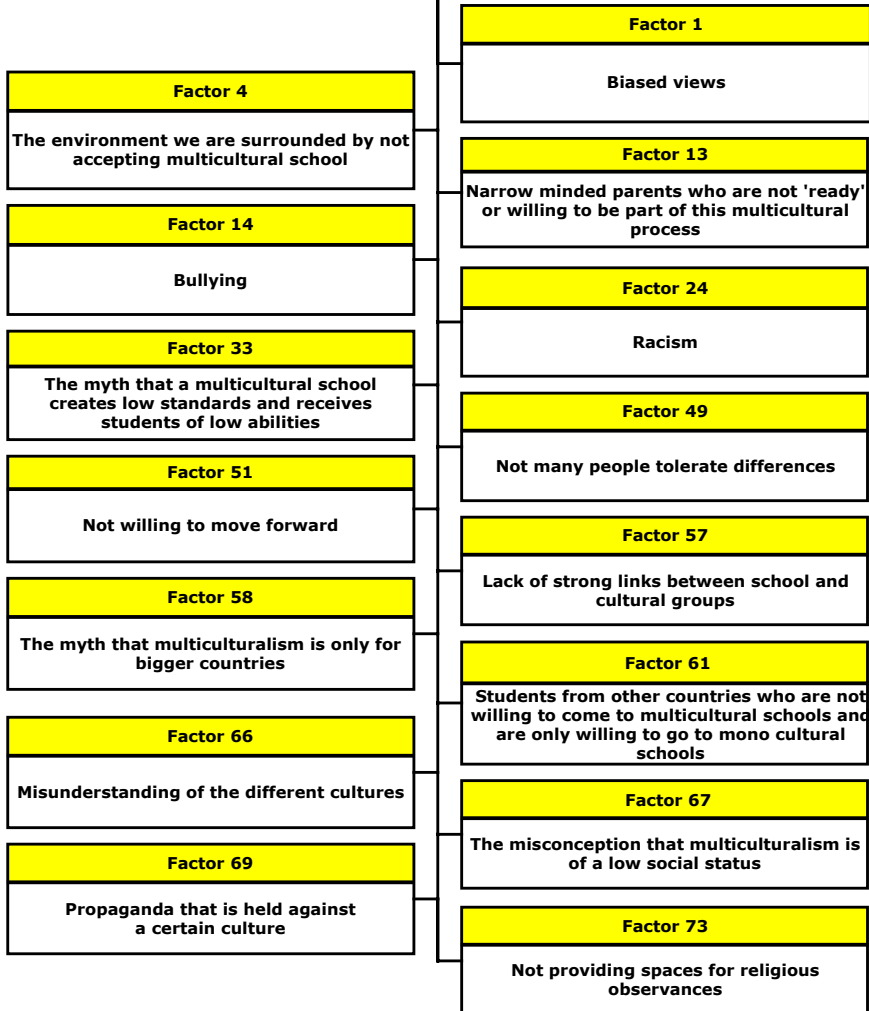

46. Students who are not willing to go to the events like dances, films and stuff like that
47. Criticism of different opinions
48. Poor relationships between parents and school
49. Not many people tolerate differences
50. Being too careful and sensitive as not to offend nationalistic opinion
51. Not willing to move forward
52. No possibility of having initiative by the teachers
53. Lack of guest speakers from multicultural backgrounds
54. Lack of government support
55. Tension created over different views and ideas
56. Poor listening skills
57. Lack of strong links between school and cultural groups
58. The myth that multiculturalism is only for bigger countries
59. Providing one sided information or sources
60. Fear of consequence
61. Students from other countries who are not willing to come to multicultural schools and are only willing to go to mono cultural schools
62. Exclusive Parents Teachers Association
63. Lack of freedom of speech
64. Misconceptions about the traditional role of a teacher in a particular culture
65. Students who may try to change the opinions of other students in a negative way
66. Misunderstanding of the different cultures
67. The misconception that multiculturalism is of a low social status
68. Finding trained teachers in core subjects from multicultural backgrounds that meet the teaching standards of the school
69. Propaganda that is held against a certain culture
70. History of certain countries that might make problems between students

71. The student influx at different times of the year makes it difficult to maintain clear school ethos
72. Finding parents who are willing to come and participate
73. Not providing space for religious observances
74. The influence of the greater countries
75. People who work at the school who don't respect children's rights
76. Different political views
77. Bad coordination

Table 4 – Obstacles to the Ideal Multicultural School: Clusters

CLUSTER 1 RESOURCES AND TRAINING	
Factor 3	The economic problem of the school
Factor 5	No funds for organising and paying for different events such as festivals, dances, etc.
Factor 7	How could we get good available Turkish language teachers
Factor 10	Lack of interactive resources
Factor 12	The need for further training for teachers in all sectors of the school
Factor 29	Lack of funds for exchange with other schools from other countries
Factor 37	Not enough multicultural pictures and posters etc.
Factor 38	Lack of public resources
Factor 45	Having staff who pretend to be openminded while they are only in need of the job

**CLUSTER 2
COMMUNITY**

**CLUSTER 3
RELATIONSHIPS**

Factor 15
Having closed minded members of staff

Factor 21
Ignorance about a particular culture

Factor 32
No cooperation amongst each other

Factor 41
Bad relationship with the neighbourhood and local authorities

Factor 48
Poor relationships between parents and school

Factor 52
No possibility of having initiative by the teachers

Factor 56
Poor listening skills

Factor 6
Racism affects the students' opinion and how they act

Factor 20
Isolation of the school

Factor 25
People not respecting each other

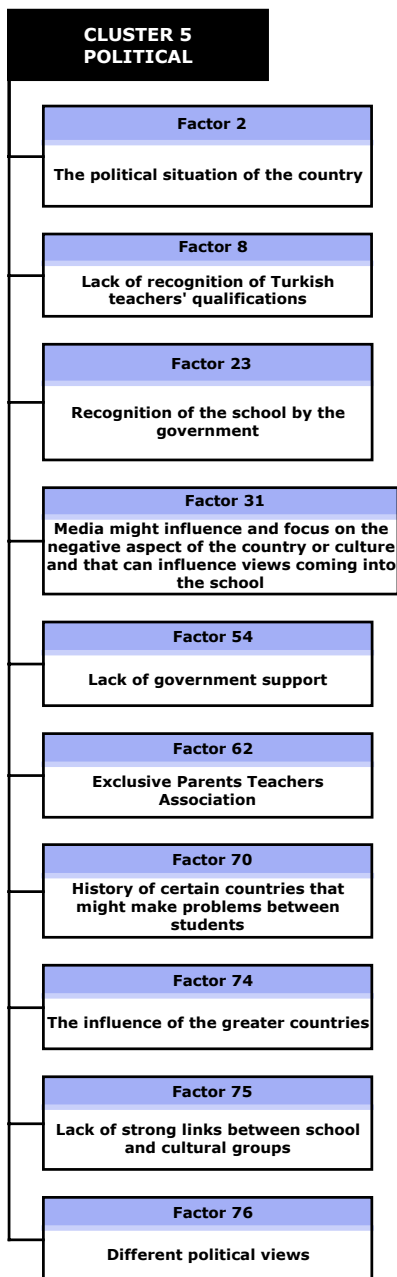

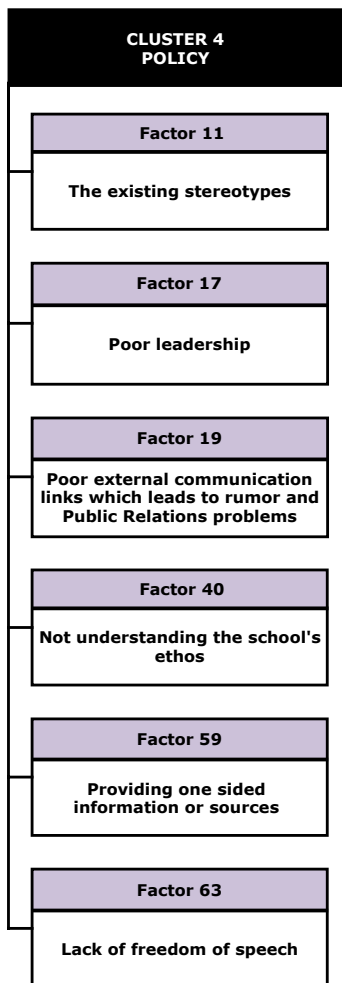

Factor 35
Poor external support

Factor 47
Criticism of different opinions

Factor 50
Being too careful and sensitive as not to offend nationalistic opinion

Factor 55
Tension created over different views and ideas

Factor 65
Students who may try to change the opinions of other students in a negative way

**CLUSTER 6
CURRICULUM**

Factor 16
Students who are uncomfortable and intimidated

Factor 22
Poor curriculum in cultural facts

Factor 27
Will students be willing to learn other languages

Factor 27
Will students be willing to learn other languages

Factor 36
Allowing religious classes to be taught but not just the religion of the country but other countries' religions as well

Factor 42
Lack of training and assisting staff in integrating multiculturalism

Factor 46
Students who are not willing to go to the events like dances, films and stuff like that

Factor 60
Fear of consequence

Factor 6
Finding trained teachers in core subjects from multicultural backgrounds that meet the teaching standards of the school

Factor 72
Finding parents who are willing to come and participate

Factor 9
The actual premises of the school

Factor 18
Will we be able to follow the curriculum but also learn about the rest of the world's history

Factor 26
Students who are unwilling to go through this multicultural process

Factor 28
Will we be able to fit in all the extra multicultural activities into an already busy timetable

Factor 34
The lack of knowledge of where to find correct information and facts

Factor 39
How to find teachers that can actually teach us about cultural dances and other aspects

Factor 43
Students are not sensitized to receive different forms of physical expression and interaction

Factor 53
Lack of guest speakers from multicultural backgrounds

Factor 64
Misconceptions about the traditional role of a teacher in a particular culture

Factor 71
The student influx at different times of the year makes it difficult to maintain clear school ethos

Factor 77
Bad coordination

Organizers

Mrs Eva Argyrou (Highgate School)

Facilitation Team

Tonia Loizidou

Mrs. Tonia Loizidou holds a BSc in Psychology from Central Michigan University, USA and an MSc in Applied Psychology from Brunel University, UK. She is also in the process of receiving her qualification in Cognitive Behavioural Therapy from Beck Institute of Cognitive Therapy and Research, USA. She joined the CNTI in May 2006 and is member of various projects such as the "Extending EU Citizenship" and "Human Rights" program. She is a trained SDDP facilitator, coordinator of the "Peaceful Europe" project and holds the psychologist's position for the "Unit for the Rehabilitation of Victims of Torture."

Larry Fergeson

Mr. Larry Fergeson is a Research Associate working in various projects. He started as an M.A. student of the Conflict Resolution Graduate Program of the Portland State University and continued as a part-time Associate in 2004. His interests include applications of technology to promote transparency, fight exclusion and human trafficking as well as a tool to bridge the digital, literacy and

economic divide. He now returned to Cyprus and re-assumed his responsibilities as part-time Coordinator of the Talk of the Island project. He is a trained SDDP Facilitator.

Kerstin Wittig

Mrs. Kerstin Wittig has an M.A. in International Relations/Peace and Conflict Studies, Educational Sciences and Islamic Sciences from the University of Tuebingen, Germany. She has conducted a 3-months field research for her M.A. dissertation on bi-communal activities in Cyprus in 2004. Kerstin has been with CNTI since October 2005. Her main responsibilities include developing

of new projects, drafting of project proposals, networking with European NGOs, especially in the field of Cultural Diversity and Development Education. She is the project coordinator for *'Building a Multi-Ethnic and Multi-National Cyprus to promote European Values and Regional and International Peace'*. Starting January 2008 she is the Head of the Development Education and Humanitarian Affairs Unit.

Yiannis Laouris

Dr. Yiannis Laouris is a Senior Scientist and President of the Cyprus Neuroscience and Technology Institute. He heads the "New Media Lab," and the "Neuroscience Lab." Neuroscientist (MD, PhD) and Systems engineer (MS) trained in Germany and the US. Publishes in the area of learning through computers, the web and mobile phones and about the potential role of IT to bridge the gaps (economic, gender, disabilities etc.) in our society. He was the Founder of a chain of computer learning centers

for children (www.cyber-kids.com). The curriculum (a new learning theory based on an educationally relevant and socially responsible approach) developed by members of the applicant organization under his supervision received 7 international awards for innovation and social responsibility. He is a senior SDDP Facilitator and has several publications about the theory of the science of dialogic design.
